

NAILING FIN INSTALLATION

- Ø Install the vertical nailing fin in the exterior jamb accessory groove as shown (Figures 1 and 2)
- Ø Use screws to fasten the vertical nailing fin to the jamb in the location shown (Figure 3)

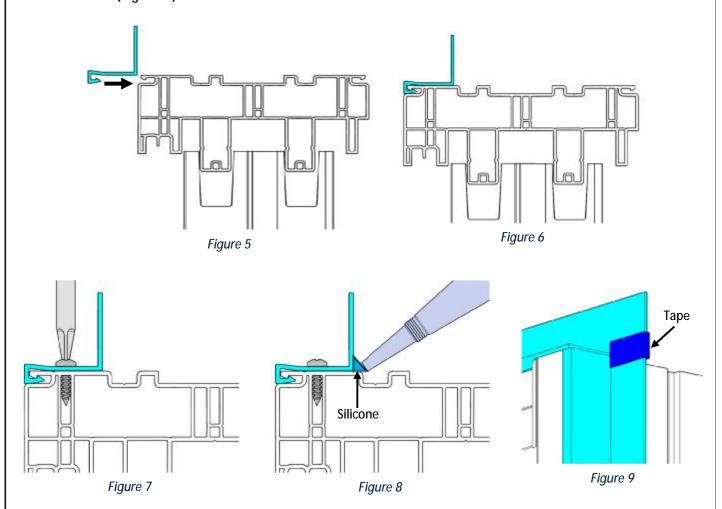

- Ø Apply silicone behind the vertical nailing fin, along the edge where the nailing fin and jamb make contact (Figure 4)
- Ø Repeat the steps above for the opposite jamb

NOTE: The vertical nailing fins are cut to the same length as the door height; ensure that the top of the vertical nailing fin is flush with the top surface of the header.

NAILING FIN INSTALLATION CONTINUED...

- Ø Install the horizontal nailing fin in the exterior header accessory groove as shown (Figure 5 and 6)
- Ø Use screws to fasten the vertical nailing fin to the jamb in the location shown (Figure 7)
- Ø Apply silicone behind the vertical nailing fin, along the edge where the nailing fin and jamb make contact (Figure 8)

Ø Apply vapour barrier sheathing tape (e.g. Tuck Tape) at the edges where the horizontal and vertical nailing fins meet

NOTE: The horizontal nailing fin is wider than the door width; ensure that the ends of the horizontal nailing fin align with the outermost edges of the vertical nailing fins.
